

Local Skills Improvement Fund Skills Injection Fund

Stakeholder communications pack

November 2023

About this pack

We have (10 November) announced a **£200 million funding boost** to support local areas to offer more high-quality training opportunities to meet local skills needs, including Higher Technical Qualifications. This is part of a government **drive to level up the country, get more people into good jobs close to home, plug skills gaps and grow the economy**. This funding is made up of:

- **Local Skills Improvement Fund - £165m funding** (£80m in 2023/24 and £85m in 2024/25) to enable collaborations of further education colleges and training providers to meet the employer skills needs identified in their area's **Local Skills Improvement Plan**.
- Alongside this, training providers will receive a share of **£44 million** from the **Skills Injection Fund** to support more people to take Higher Technical Qualifications.

This stakeholder pack provides information for **employers, employer representative bodies, further education providers, trade and skills sector bodies and other stakeholders** to support you to communicate what this means with your audiences. If you have any questions or would like further information, please email alice.gulland@education.gov.uk

Key messages

- People across the country are set to benefit from more skills training to help them launch careers in key industries, including in the growing green sector.
- More than **£200m of funding** through the **Local Skills Improvement Fund and Skills Injection Fund** will support areas to offer more high-quality training opportunities to meet local skills needs.
- This is part of a government drive to level up the country, get more people into good jobs close to home, plug skills gaps and grow the economy..
- Investment will support key areas for the growth of the economy, including – **green skills, construction, health and social care, digital** and the **creative industries**.
- The Local Skills Improvement Fund will provide investment in **new facilities and equipment**, fund the development and delivery of **new courses and curriculum**, and support **excellence in college leadership, governance and teaching** to create a sustainable approach to addressing local skill needs. This follows the publication of **employer-led Local Skills Improvement Plans** this August, bringing business and education closer together
- The Skills Injection Fund will support more people to take Higher Technical Qualifications.

£200 million skills funding boost

More than £200 million has been announced [today/on 10 November] to support colleges and training providers to offer more training opportunities in key industries, including the green sector. Investment is being targeted to address the specific skills needs of each region, which local businesses and employers have identified as priority sectors in their Local Skills Improvement Plans, giving them access to the skilled workforce they need to grow.

- The Local Skills Improvement Fund allocates £165m funding (£80m in 2023/24 and £85m in 2024/25) to colleges and training providers to work collaboratively to meet the employer skills needs identified in their area's Local Skills Improvement Plans.
- Alongside this, training providers will receive a share of £44 million from the Skills Injection Fund to support more people to take Higher Technical Qualifications – that sit between A level, T levels and degrees – to gain in demand skills including digital, health care and engineering as an alternative to a traditional three-year degree.
